Response to Office Action

Customer No. 01933

**Listing of Claims:**

1. (Currently Amended) A data recording and reproducing apparatus having a function of reproducing audio data and image data associated with the audio data, said apparatus comprising:  
audio data reproducing means for reproducing audio data; and  
5 display means for displaying, while the audio data reproducing means is reproducing the audio data, first information including character data representing a reproduction status of the audio data, and for displaying second information including image data associated with the audio data being  
10 reproduced.

2. (Currently Amended) A data recording and reproducing apparatus having comprising:  
audio data reproducing means for reproducing selected audio data; ~~selected, and~~  
display means for displaying at least image data associated with the selected audio data; ~~selected, said apparatus comprising:~~  
instruction means for instructing ~~the display means whether~~ to display ~~or not to display~~ the image data with the display means when the audio data reproducing means reproduces the audio data; and

control means for causing the display means to display data representing a reproduction status of the audio data, when the instruction means instructs the display means not to display the image data.

3. (Original) The apparatus according to claim 2, wherein the control means causes the display means to display the reproduction status of the audio data after displaying the image data for a predetermined time, when the instruction means instructs the display means to display the image data.

Claim 4 (Canceled).

5. (Currently Amended) A data recording and reproducing apparatus capable of reproducing audio data and image data associated with ~~that~~ a part of the audio data ~~which that~~ is recorded ~~the~~ at a moment when the image data is generated, said  
5 apparatus comprising:

display means for displaying an operating status of the apparatus; and

control means for causing the display means to display first  
information including character data representing a reproduction  
10 status of the audio data while the audio data is being  
reproduced, and for displaying second information including the

image data associated with said part of the audio data, when said part of the audio data is reproduced.

6. (Currently Amended) The apparatus according to claim 5, wherein every time said part of the audio data is reproduced, said control means causes the display means to display the second information for a predetermined time and then to display the first information upon lapse of the predetermined time.

7. (Currently Amended) A data recording and reproducing apparatus having a function of recording audio data and image data associated with the audio data, said apparatus comprising:

audio data recording means for recording audio data; and

5 ~~imaging means~~ imaging means for recording image data in association with a time elapsed ~~in the process of~~ during recording of the audio data, while the audio data recording means is recording the audio data.

8. (Currently Amended) A data recording and reproducing apparatus having a function of recording audio data and image data associated with the audio data, said apparatus comprising:

audio data reproducing means for reproducing audio data; and

display means for displaying, while the audio data reproducing means is reproducing the audio data, first
